DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I-A. Claims 1-14, drawn to liquid cooler, classified in class 62, subclass 457.4.
 - I-B. Claims 27-31, drawn to liquid cooler, classified in class 62, subclass 457.4.
 - I-C. Claims 15-26, drawn to liquid cooler, classified in class 62, subclass 457.7.
 - I-D. Claims 32-37, drawn to liquid cooler, classified in class 62, subclass 457.7.
 - II-A. Claims 38-48, drawn to method of chilling liquid in the container, classified in class 62, subclass 62.
 - II-B. Claims 49-55, drawn to method of sale chilling container, classified in class 62, subclass 63.

Applicant is required to elect one Group because the inventions are distinct and have species.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions Group I-A,I-B,I-C,I-D and Group II-A,II-B are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice at least two different processes as claimed in the claims 38 and 49.

3. Inventions I-A,I-B and I-C,I-D are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that

Art Unit: 3744

the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination of claims 15 and 27 do not require the particulars of the subcombination such as membrane in the claim 27 or heat fin in the claim 1. The subcombination has separate utility such as used in the cooler in the claim 15 or refrigerator in the claim 32.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, and the search required for Group I-C,I-D is not required for Group I-A,I-B restriction for examination purposes as indicated is proper.

6. This application contains claims directed to the following patentably distinct species of the claimed invention:

In the Group II-A and Group II-B:

Group II-A: species of liquid cooler with housing and block, claims 38-48.

Group II-B: species of freezer door with liquid cooler, claims 49-55.

In the Group I-A and Group I-B:

Group I-A: Figs.1-3, claims 1-14.

Group I-B: Figs.6-7, claims 27-31.

In the Group I-C and Group I-D:

Group I-C: Fig.8, claims 15-26.

Group I-D: Fig.10, claims 32-37.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
